Louisiana Sheriffs' Pension & Relief Fund, Lead Plaintiff ("Plaintiff"), respectfully opposes Defendants' Motion to Dismiss (ECF No. 60).

## **INTRODUCTION**

Skyworks is a semi-conductor company that generates the majority of its revenue by supplying components to Apple for iPhones. The Complaint alleges that Defendants—Skyworks and its former CEO, Liam K. Griffin, and its former CFO, Kris Sennesael—repeatedly misled investors that Skyworks was maintaining or growing its content position in the iPhone 16 and iPhone 17. For example, Defendants told investors, “[W]e continue to win big” with Apple, that “nothing is really concerning” regarding the Apple relationship, and that the “back and forth [with Apple] is always going our way.”

These statements were false and misleading. Under the established timeline in which Apple communicated content decisions to iPhone suppliers, Defendants knew that Skyworks had lost a material content position in each of the iPhone 16 and the iPhone 17 when they made these misstatements. When Defendants finally revealed the iPhone 16 content losses in April 2024, the market was stunned, leading to a share price decrease of 15%. To comfort investors, Defendants portrayed those losses as a one-time aberration. Yet, just ten months later, in February 2025, Defendants were forced to disclose ***even greater*** content losses in the iPhone 17, causing the share price to plummet by 25%. Griffin, a long-time Skyworks executive, was forced to resign; Sennesael followed him at the end of the next quarter.

Defendants' Motion distorts the well-pleaded facts and misapplies the law in arguing that the Complaint fails to allege falsity and scienter. Their arguments fail.

Defendants' principal argument is that the Complaint fails to adequately allege the well-established timeline in which Apple communicated content decisions to Skyworks. The timeline allegations are supported by detailed and corroborative sources, including well-placed former employees who worked at Skyworks over

1 multiple iPhone cycles, competitors who revealed information about iPhone content  
2 wins, well-sourced analysts and other industry insiders, and credible media sources.  
3 These facts are more than sufficient to allege the product development timeline at  
4 the pleading stage. Indeed, Defendants do not advance *any* argument that there had  
5 been a change in the standard timeline for the iPhone 16 and iPhone 17.

6 Defendants next contend that the Complaint fails to allege a single actionable  
7 misstatement, asserting that their statements were forward-looking, mere puffery, or  
8 opinions. Because each of these statements misrepresented present facts, and were  
9 not accompanied by any meaningful cautionary language, they do not qualify for the  
10 safe harbor. Likewise, none of the misstatements are immaterial puffery. Each  
11 related to Skyworks's relationship with its self-described "largest customer" and  
12 "most important customer," Apple, and the misstatements directly influenced  
13 analysts' coverage. Further, because Defendants misrepresented facts, not opinions,  
14 their misstatements easily satisfy the *Omnicare* standard even if analyzed as  
15 opinions. Finally, Defendants did not accurately disclose the risk of content losses  
16 to investors in SEC filings; rather, they misleadingly described content losses as  
17 hypothetical and provided later, unqualified assurances that Skyworks's content  
18 position was secure.

19 Finally, the Complaint adequately alleges scienter. Defendants' claim—that  
20 Plaintiff must allege direct, "smoking-gun" evidence of when Apple informed  
21 Defendants of content losses—misstates the scienter pleading standard. Direct  
22 admissible evidence of knowledge is not required; instead, *Tellabs* allows Plaintiff  
23 to plead facts that, holistically, support a strong inference of scienter. Here, the  
24 strongest and most reasonable inference is that Defendants knew about the content  
25 losses given the established iPhone content timeline, Defendants' repeated  
26 statements evincing their knowledge of Skyworks's content position with Apple, and  
27 the undisputable fact that selling iPhone components to Apple was the critical core  
28 operation at Skyworks. Even if Defendants did not know this information (which is

1 implausible), their positive statements to investors about Skyworks's so-called  
2 positive execution and content gains were highly reckless.

3 Defendants' motion should be denied in its entirety.

4 **BACKGROUND**

5 **I. SKYWORKS'S VALUE DEPENDED ON ITS IPHONE CONTENT  
6 POSITION**

7 Skyworks is a semiconductor manufacturer that provides radio frequency  
8 front-end modules for iPhones. ¶2. Apple accounted for 69% of Skyworks's overall  
9 revenue in 2024 and, at times in the Class Period, ***over 70%*** of its revenue;  
10 approximately 85% of the Apple revenue related to the iPhone. ¶¶1, 3, 35. As a  
11 result, Defendants referred to Apple as Skyworks's "largest" and "most important"  
12 customer. ¶¶4, 35, 191. Analysts recognized Skyworks's outsized dependence on  
13 Apple for its revenues, and that "it would be a catastrophic blow to Skyworks if it  
14 were to ever miss out on a future iPhone design cycle." ¶37.

15 Since 2007, Apple has released a new iPhone model each year – now always  
16 in September. ¶45. Given the iPhone's technological complexity, Apple has relied  
17 on a standard, multi-year development timeline for each model launch:

- 18 • Approximately 17-18 months before the iPhone launch date, i.e., March  
19 or April in the prior year, component suppliers, like Skyworks submitted  
20 their bids, and Apple engaged in a process to pick content suppliers. ¶50.<sup>2</sup>
- 21 • Approximately 15-16 months before the iPhone launch date, i.e., May or  
22 June of the prior year, Apple made content selections and notified  
23 suppliers. ¶¶51-53.
- 24 • Approximately 12 or 13 months before the iPhone launch date, i.e.,  
25 August or September of the prior year, the selected component suppliers  
26 began their initial production process. ¶54.
- 27 • Approximately eight months before the iPhone launch date, i.e., January  
28 in the year of the launch, Skyworks and other component suppliers began

---

<sup>2</sup> For approximately two years prior to bidding, Skyworks would make multiple versions of the components it would submit to Apple for consideration. ¶49.

1 sending manufactured components to Apple so that Apple can begin its  
2 own production process. ¶54.

3 The Complaint corroborates this timeline through multiple sources.

4 *First*, two Skyworks former employees involved in the manufacturing process  
5 confirmed the timeline. FE 1 worked at Skyworks from April 2015 to March 2023  
6 as a Program Management Support-Pre-Production Expeditor in Newbury Park,  
7 California, and specialized in inventory, supply planning, and program management  
8 for Apple products. ¶38. In that role, FE 1 participated in weekly, monthly, and  
9 quarterly production meetings in which Defendant Griffin and other Skyworks  
10 executives discussed Skyworks's main customers and competitors, as well as the  
11 specific components on which Skyworks had won or lost in the bidding process.  
12 ¶¶182-83. Given FE 1's job responsibilities, FE 1 was in a position to know that  
13 Skyworks learned about bidding decisions for an upcoming iPhone model by June  
14 of the preceding year (i.e., approximately 15 months prior to launch). ¶53 (noting  
15 FE 1's participation in site-level program management teams in which "FE 1 and  
16 the program management team would know what products Skyworks won in the  
17 bidding process, as well as whether components would be dual-sourced"). FE 1  
18 further described that production commenced in or around August or September of  
19 the preceding year (i.e., approximately 12-13 months prior to launch), with larger  
20 builds handled by Skyworks's Mexicali, Mexico facility. ¶54. According to FE 1,  
21 Skyworks would send certain manufactured component parts to Apple in or around  
22 January of the launch year (i.e., 9 months prior to launch). *Id.*

23 FE 2 is another former Skyworks employee who worked as a Senior Supply  
24 Chain Manager at Skyworks's facilities in Mexicali, Mexico, from 2017 to 2023.  
25 ¶59. In that role, FE 2 was responsible for the planning and procurement of  
26 manufacturing at the Mexicali facility, as well as for managing outsource services  
27 (planning, procurement, and deliveries) in the Asia Pacific Region. *Id.* FE 2  
28 confirmed that iPhone manufacturing began in Mexicali in approximately early-

1 January of the year of release, following earlier production in the United States. *Id.*

2 **Second**, Skyworks's competitors and analysts from leading financial firms  
3 also corroborated key aspects of the timeline. For example, both Goldman Sachs and  
4 Oppenheimer reported in June 2024 that Broadcom, which had existing content  
5 positions within the iPhone but not the specific RF components manufactured by  
6 Skyworks, disclosed that it had won "new RF content in iPhone 17 **next year**"—i.e.,  
7 for the September 2025 iPhone 17 launch date. ¶¶91-92. After Skyworks revealed  
8 that it lost content in the iPhone 17 in February 2025, other analysts connected that  
9 content loss by Skyworks to Broadcom's June 2024 disclosure. ¶113 (Wolfe  
10 Research note referencing Broadcom's summer disclosure of "content gains in an  
11 area they had not previously participated"); ¶115 (J.P. Morgan note regarding  
12 Broadcom's "prior comments on potential share gains"). Thus, Broadcom and at  
13 least four prominent analysts reported that Broadcom had won RF content in June  
14 2024, approximately 15 months before the iPhone 17 launch—which is consistent  
15 with the established iPhone timeline alleged in the Complaint.

16 Likewise, Qualcomm, another one of Skyworks's main competitors, told  
17 analysts in November 2023 that it "expect[ed] this 10-ish percentage increase in  
18 content at the minimum" for the upcoming iPhone 16, which was not scheduled to  
19 launch until September 2024, nearly ten months later. ¶68. As analysts subsequently  
20 determined, this increase resulted, in part, from Qualcomm winning a component on  
21 the iPhone 16 at Skyworks's expense. ¶¶81-85.

22 **Third**, multiple media and industry publications further corroborated the  
23 timeline. For example, in a 2020 interview with the *Wall Street Journal*, a senior  
24 Apple executive explained that Apple follows a multi-year process to develop the  
25 iPhone in part to "plan how multiple chips work together to limit power consumption  
26 and free up space inside iPhones[.]" ¶48. In January 2023, *PC Magazine* reported  
27 that Apple had begun its early production process, known as New Product  
28 Introduction, for the iPhone 15; this meant that Apple had "an actual production line

1 running for the new [iPhone model]” eight months before launch. ¶58. And in a May  
2 2025 interview, a former Apple manager who had just left the company told the  
3 industry publication *AlphaSense Expert Insights* that content suppliers like  
4 Skyworks begin producing their components approximately a year before the iPhone  
5 launch date in September, at which point Apple has “already locked the design  
6 down.” ¶55 (noting Apple pulled stock together “a year out from launch”).

7 **II. DEFENDANTS MISREPRESENTED SKYWORKS’S iPhone 16  
CONTENT POSITION**

9 By June 2023, Defendants knew that Skyworks lost content on the iPhone 16  
10 because Apple awarded a component to Qualcomm instead, decreasing Skyworks’s  
11 position by approximately 10%. ¶¶76-83. Yet, as illustrated by the timeline in  
12 Appendix A (Figure 1), Defendants repeatedly misled investors that Skyworks had  
13 maintained or grown its iPhone 16 content between August 2023 and April 2024.

14 On August 7, 2023, for example, Sennesael stated that “*we continue to win  
big with [Apple]*” and that “*we win with . . . every product . . . that they will bring  
to the future.*” ¶128. On November 2, 2023, Griffin answered a question about  
15 Skyworks’s ability to “grow content another 10%” in 2024 by saying that the  
16 Company was “executing in an outstanding way” and “certainly matching the  
17 challenges with our top tier customers.” ¶132. On January 30, 2024, Griffin  
18 answered a direct question about “losing content at [Apple] in the second half of the  
19 year” by claiming that “[n]othing is really concerning on that point[.]” ¶¶134-136.

20 These statements led analysts to believe that Skyworks’s iPhone position “is  
21 secure gen/gen” and that it “can sustain 10% Y/Y dollar content growth in future  
22 smartphone launches.” *E.g.*, ¶75 (analyst reports in Aug. 2023, Nov. 2023, and Jan.  
23 2024). When Defendants finally disclosed the content loss in April 2024,  
24 Skyworks’s share price fell approximately 15%. ¶¶76-80. Analysts directly  
25 attributed the decline to Skyworks’s disclosure about its lost content position to  
26 Qualcomm. ¶¶81-84.

1 **III. DEFENDANTS MISREPRESENTED SKYWORKS'S IPHONE 17  
2 CONTENT POSITION**

3 After the iPhone 16 content loss, investors focused on whether this was a  
4 “transitory issue” for Skyworks. ¶87. Analysts were comforted by Skyworks’s claim  
5 that this loss was limited to “one year, one socket.” ¶¶86-87. Unbeknownst to  
6 investors, the iPhone 16 loss was far from transitory. By June 2024 when Broadcom  
7 disclosed a “new RF content [win] in iPhone 17,” ¶92, Defendants knew that  
8 Skyworks had lost an additional content position on the iPhone 17.

9 Yet, as illustrated by Figure 2 in Appendix A, Defendants repeatedly misled  
10 investors that Skyworks’s content position on the iPhone 17 was secure. On an  
11 earnings call on November 12, 2024, for example, Griffin answered a direct question  
12 about Skyworks’s ability to win back content by claiming that the “***back and forth***  
13 ***[with Apple] is always going our way.***” ¶140. In a meeting with Oppenheimer  
14 analysts on January 8, 2025, Sennesael said the iPhone 16 loss was an “aberration,”  
15 that Skyworks had “positive tailwinds from Apple design process,” and that the  
16 Company expected “content ASP [Average Selling Price] back to historical average  
17 10%/year growth.” ¶¶142-43. Analysts credited these reassurances. ¶¶86-87.

18 On February 5, 2025, when Skyworks had no choice but to reveal its iPhone  
19 17 position and Griffin’s immediate resignation, it disclosed that it had lost an  
20 additional 20-25% of content in the iPhone 17—as a socket previously sold by  
21 Skyworks would now be dual-sourced. ¶¶104-08. The share price plummeted by  
22 25%. ¶110. This disclosure shocked analysts, who connected Skyworks’s loss of  
23 Apple content with both the stock price decline and Griffin’s resignation. ¶¶111-22.  
24 Skyworks’s new CEO admitted in March 2025 that, ***over the last three years***, the  
25 Company had not “been growing our content,” that “we haven’t been performing  
26 that well,” and that the Company had not delivered “the best product.” ¶¶123-27.  
27 Sennesael departed the next quarter. ¶31.

1 **ARGUMENT**

2 **I. PLAINTIFF ADEQUATELY ALLEGES THE IPHONE 16 AND 17  
3 DEVELOPMENT TIMELINE**

4 On motions to dismiss, courts must “take all allegations of material fact as  
5 true and construe them in the light most favorable to the nonmoving party.” *In re*  
6 *Quality Sys., Inc. Sec. Litig.*, 865 F.3d 1130, 1140 (9th Cir. 2017). To properly allege  
7 falsity, Plaintiff need only “specify each statement alleged to have been misleading,  
8 the [] reasons why the statement is misleading, and, if an allegation regarding the  
9 statement or omission is made on information and belief, . . . state with particularity  
10 all facts on which that belief is formed.” *Zucco Partners, LLC v. Digimarc Corp.*,  
11 552 F.3d 981, 990-91 (9th Cir. 2009). At this stage, a court is “not sitting as a trier  
12 of fact,” and “so long as the plaintiff alleges facts to support a theory that is not  
13 facially implausible, the court’s skepticism is best reserved for later stages.” *In re*  
14 *Gilead Scis. Sec. Litig.*, 536 F.3d 1049, 1057 (9th Cir. 2008) (reversing dismissal).

15 Consistent with these principles, courts routinely credit product development  
16 and supply chain timelines based on the descriptions of former employees and  
17 industry norms. *See, e.g., Gammel v. Hewlett-Packard Co.*, 2013 WL 1947525, at  
18 \*13 (C.D. Cal. May 8, 2013) (crediting former employee allegations); *In re*  
19 *OmniVision Techs., Inc. Sec. Litig.*, 937 F. Supp. 2d 1090, 1106-07 (N.D. Cal. 2013)  
20 (relying on a former employee, analyst reports, and a competitor); *Altimeo Asset*  
21 *Mgmt. v. Qihoo 360 Tech. Co., Ltd.*, 19 F.4th 145, 150-51 (2d Cir. 2021) (crediting  
22 allegations from former employees and news articles).

23 Defendants contend that the Complaint fails to properly substantiate the  
24 timeline of when Apple informed them that Skyworks had lost content in the iPhones  
25 16 and 17. DB 6. But, as described below, the Complaint establishes the standard  
26 development timeline that Apple has followed to launch its new iPhone models,  
27 including iPhones 16 and 17, based on first-person accounts of former employees,  
28 statements of Skyworks’s competitors, and credible media and industry sources.

1           **A. The Former Employees Have Personal Knowledge of the Standard**  
2           **iPhone Development Timeline**

3           The Complaint describes the personal involvement of FE 1 and FE 2 in  
4 Skyworks's process of manufacturing iPhone content "with sufficient particularity  
5 to support the probability that a person in the position occupied by the source would  
6 possess the information alleged" about the standardized iPhone timeline. *Quality*  
7 *Sys.*, 865 F.3d at 1145. The Complaint "includes each confidential witness's job  
8 description and responsibilities," as well as their "exact title," *id.*, and it recounts  
9 how each worked at Skyworks over a multi-year period and had personal knowledge  
10 of the Skyworks manufacturing process for the iPhone. FE1's and FE 2's statements  
11 also corroborate each other, which further "supports the reliability of the  
12 statements." *Cullen v. Ryvyl Inc.*, 2024 WL 4536471, at \*13 (S.D. Cal. Oct. 21,  
13 2024) (citing cases). Other evidence corroborates the timeline allegations, *infra* at 9-  
14 12, which bolsters the reliability inference. The FE allegations are thus more than  
15 sufficient to establish the reliability and personal knowledge required under the law.  
16 *See, e.g., In re Splunk Inc. Sec. Litig.*, 592 F. Supp. 3d 919 (N.D. Cal. Mar. 21, 2022).

17           Defendants' attempts to discredit the FE allegations should be rejected.

18           First, Defendants suggest that because neither FE had "responsibility for any  
19 aspect of the" down selection process, neither would have known about bidding and  
20 selection decisions. DB 7. Yet, the Ninth Circuit has rejected that executive decision-  
21 making is a requirement to be a reliable witness. *Berson v. Applied Signal, Inc.*, 527  
22 F.3d 982, 985 (9th Cir. 2008). Defendants do not contest that FE 1 and FE 2 were  
23 involved in the manufacturing process, and they ignore specific allegations that  
24 Griffin and other Skyworks executives informed employees like FE 1 about the  
25 status of bidding and sourcing decisions. ¶¶182-83. That neither FE 1 nor FE 2  
26 interfaced with Apple about sourcing decisions is immaterial. Each worked at  
27 Skyworks for multiple years (FE 1 for over eight years and FE 2 for over five years)  
28 and were "in a position to know" Skyworks's iPhone manufacturing timeline.

1 *Berson*, 527 F.3d at 985.

2       Second, Defendants claim that the Court should discredit the FE allegations  
3 because FE 1 and FE2 left Skyworks before the launch of the iPhone 16 and iPhone  
4 17. However, courts regularly credit statements of former employees who were not  
5 employed during the class period. *Quality Sys.*, 865 F.3d at 1145; *Roberts v. Zuora*,  
6 2020 WL 2042244, at \*11 (N.D. Cal. April 28, 2020). FE 1 and FE 2, who were  
7 each personally involved with Skyworks’s production of iPhone components over  
8 multiple development cycles, knew, or at least “could reasonably deduce,” the  
9 iPhone development timeline. *Berson*, 527 F.3d at 985. These are the exact type of  
10 “allegations concerning activity in one period” that “can support an inference of  
11 similar circumstances in a subsequent period.” *Emps. Ret. Sys. of Gov’t of V.I. v.*  
12 *Blanford*, 794 F.3d 297, 307 (2d Cir. 2015). Notably, Defendants do not advance  
13 any argument that there had been a change in the standard timeline for the iPhone  
14 16 and iPhone 17. *OmniVision*, 937 F. Supp. 2d at 1113 (“the court can reasonably  
15 infer” that a long-term practice remained “unchanged” two years later); *Greco v.*  
16 *Qudian Inc.*, 2022 WL 4226022, at \*13 (S.D.N.Y. Sept. 13, 2022) (inference that  
17 practice described by CW continued into the Class Period.).

18       **B. Competitor Statements Further Corroborate the iPhone Timeline**

19       The iPhone development timeline is corroborated by information relating to  
20 two of Skyworks’s competitors—Qualcomm and Broadcom. *Supra* at 5. For  
21 example, Broadcom and several analysts disclosed that Broadcom had won new  
22 content in the iPhone 17 in June 2024, approximately 15 months prior to the iPhone  
23 17 launch. ¶¶90-93. Multiple analysts later connected that win to Skyworks’s lost  
24 content. ¶¶113-16. Likewise, Qualcomm told investors in November 2023 that it had  
25 won new content in the iPhone 16, ¶68, which analysts connected to Skyworks.  
26 ¶¶81-84. As in *Omnivision*, this information corroborates that Apple notified  
27 component suppliers like Skyworks, Qualcomm, and Broadcom of their iPhone 16  
28 and iPhone 17 content positions well before Skyworks revealed the truths in April

1 2024 and February 2025. *See* 937 F. Supp. 2d at 1109 (crediting allegations that  
2 “Apple was seriously considering purchasing some or all of the camera components  
3 at issue from Sony” based on statements by Sony and within analyst reports).

4 Rather than address the clear import of the Qualcomm and Broadcom  
5 statements, Defendants wrongly contend that “Plaintiff concludes, ***with no other***  
6 ***facts***, that Skyworks must have known of a content loss at [the] time” of the  
7 Broadcom statement. DB 11. This is belied by the extensive former employee and  
8 industry insider information detailed in the Complaint and discussed above. More  
9 basically, Defendants improperly ask the Court to construe each factual allegation  
10 in isolation while ignoring the other facts alleged by Plaintiff, and to withhold any  
11 favorable inferences from Plaintiff. This argument directly contradicts that courts  
12 “take all allegations of material fact as true,” *Quality Sys.*, 865 F.3d at 1140, and  
13 holistically assess the Plaintiff’s “narrative of fraud.” *ESG Cap. Partners, LP v.*  
14 *Stratos*, 828 F.3d 1023, 1035 (9th Cir. 2016). Viewed collectively, the Qualcomm  
15 and Broadcom allegations further support an inference that Skyworks, like its  
16 competitors, knew of its content losses before the misstatements. Defendants’  
17 argument that Apple informed Qualcomm and Broadcom of content wins months  
18 before informing Skyworks of content losses is implausible.

19 **C. Industry Insiders’ Statements Corroborate the iPhone Timeline**

20 “Media sources can satisfy the heightened pleading standard” of the PSLRA.  
21 *In re Loewen Grp. Inc. Sec. Litig.*, 2004 WL 1853137, at \*6 (E.D. Pa. Aug. 18, 2004)  
22 (considering information “published in industry journals . . . and reputable  
23 newspapers” as “being independent and reliable”). Here, interviews with Apple  
24 executives in *AlphaSense* and the *Wall Street Journal* and reporting by *PC Magazine*  
25 further corroborate FE 1 and FE 2’s iPhone development timeline.

26 As recently as May 2025, an executive who worked at Apple until earlier that  
27 month, confirmed to *AlphaSense* that “a year out from launch,” Apple would be  
28 “getting the [component] manufacturers making their bits [and] trying to get some

1 stock together.” ¶55. This supports *PC Magazine*’s report that, by January 2023,  
2 Apple’s own production for iPhone 15 had begun. ¶58. As courts recognize, media  
3 sources can support plausible allegations as to a “typical . . . production supply chain  
4 timeline.” *Hatamian v. Advanced Micro Devices, Inc.*, 87 F. Supp. 3d 1149, 1159-  
5 60 (N.D. Cal. 2015); *Qihoo*, 19 F.4th at 150-51 (crediting two news articles).

6 Defendants’ reliance on *Applestein v. Medivation*, 861 F. Supp. 2d 1030,  
7 1038-39 (N.D. Cal. 2012), DB 7, is unavailing. *AlphaSense* is an industry publication  
8 containing transcribed interviews with industry insiders. The published *AlphaSense*  
9 interview is not “hearsay” that counsel learned about by eavesdropping on a  
10 conversation; nor was the former Apple executive interviewed as a “confidential  
11 witness.” *Id.* The suggestion that Plaintiff cannot rely on publicly available  
12 information in an industry resource like *AlphaSense* at the pleadings stage, DB 7-8,  
13 simply misstates the law. *See In re McKesson HBOC, Inc. Sec. Litig.*, 126 F. Supp.  
14 2d 1248, 1271 (N.D. Cal. 2000) (crediting news articles because PSLRA does not  
15 require plaintiffs “to produce admissible evidence” at the pleadings stage).

## 16 **II. THE COMPLAINT ALLEGES MATERIAL MISSTATEMENTS**

17 Based on the timeline in which Apple communicated content decisions, the  
18 Complaint pleads Defendants made a series of misleading statements to investors  
19 that “affirmatively created an impression” that Skyworks had secured or grown its  
20 content position for the iPhone 16 and the iPhone 17, when the truth was the opposite  
21 of that “affirmative[] impression”: Defendants knew that Skyworks had lost material  
22 content positions in both iPhone cycles. *Turocy v. El Pollo Loco Holdings, Inc.*, 2017  
23 WL 3328543, at \*9-10 (C.D. Cal. Aug. 4, 2017).

### 24 **A. Alleged Misstatements Regarding the iPhone 16**

#### 25 **1. August 7, 2023 Quarterly Earnings Call**

26 Defendants selectively quote Sennesael’s answer to a question in this earnings  
27 call to suggest it relates to “revenue generated by content wins from the iPhone 15  
28 and other Apple products” and was thus not misleading. DB 13. But Sennesael said

1 that Skyworks “*continue[s] to win big*” with Apple, and also that Skyworks wins on  
2 “every product that they brought to the market and *that they will bring to the*  
3 *future.*” ¶65. Once Sennesael chose to speak on current and future Apple revenue,  
4 he was “bound to do so in a manner that wouldn’t mislead investors.” *Khoja v.*  
5 *Orexigen Therapeutics, Inc.*, 899 F.3d 988, 1009 (9th Cir. 2018). The statement  
6 referencing “continu[i]ng” (as well as “future”) content wins misrepresented  
7 Skyworks’s content position for the iPhone 16 cycle that was then under  
8 development, and it was false because Sennesael knew before August 2023 that  
9 Skyworks had *lost* content in this cycle. Whether investors *only* would have  
10 interpreted the statement as relating to the iPhone 15 cannot be decided on the  
11 pleadings, particularly given allegations that analysts believed Skyworks’s iPhone  
12 position was “secure gen/gen.” ¶75. “[W]hether a public statement is misleading, or  
13 whether adverse facts were adequately disclosed is a mixed question to be decided  
14 by the trier of fact.” *Fecht v. Price Co.*, 70 F.3d 1078, 1081 (9th Cir. 1995).

15 Defendants are also wrong to suggest this statement is inactionable puffery.<sup>3</sup>  
16 Sennesael responded to an analyst’s specific question about Skyworks’s revenue  
17 from its largest customer, Apple, in which he addressed a “specific aspect[] of the  
18 company’s operations,” its crucial relationship with Apple for iPhone content.  
19 *Quality Sys.*, 865 F.3d at 1143-44 (statement reassuring investors “that the number  
20 and type of *prospective* sales in the pipeline was unchanged, or even growing”  
21 actionable) (citing cases). The fact this answer led analysts to view Skyworks’s  
22 iPhone position as “secure” further refutes the puffery argument. *E.g.*, ¶75. In  
23 contrast, the puffery cases cited by Defendants, DB 13, involved generic corporate  
24 statements that were “otherwise true,” *Terezeni v. GoodRx Holdings, Inc.*, 2022 WL  
25

26 <sup>3</sup> Puffery determinations are “inherently fact-specific” inquiries that are generally  
27 inappropriate at the pleading stage. *Matrixx Initiatives, Inc. v. Siracusano*, 563 U.S.  
28 27, 39 (2011); *In re SVB Fin. Grp. Sec. Litig.*, 2025 WL 1676800, at \*11 (N.D. Cal.  
June 13, 2025) (“courts must exercise great caution” regarding puffery).

1 122944, at \*4 (C.D. Cal. Jan. 6, 2022); or “nebulous” statements regarding “quality”  
2 that were not objectively verifiable (like whether Skyworks had gained a content  
3 position in the next iPhone). *Peters v. Twist Bioscience Corp.*, 2025 WL 2532671,  
4 at \*7 (N.D. Cal. Sept. 3, 2025).

5 **2. November 2, 2023 Quarterly Earnings Call**

6 Defendants next attack two statements made by Defendant Griffin during an  
7 earnings call on November 2, 2023, contending that they are unrelated to Apple or  
8 mobile content, and constitute immaterial puffery. Both arguments fail.

9 First, Griffin was asked whether Skyworks “can grow content another 10%”  
10 in 2024. ¶132. A reasonable investor would have interpreted the question to be about  
11 2024 revenues relating to the iPhone 16, as the Complaint details numerous instances  
12 in which investors understood Defendants’ references to 10% growth year-over-year  
13 as relating to the iPhone. *See* ¶¶8, 13, 66, 69, 75, 99-101, 132.

14 Griffin answered by saying that his team was “*executing* in an outstanding  
15 way,” committed to “growth,” and “certainly *matching the challenges* with our *top*  
16 *tier customers*.” ¶132. Contrary to Defendants’ claim that “no alleged facts show  
17 that the market” connected this statement to “a particular content position in the  
18 iPhone 16,” DB 14, the Complaint cites multiple analysts who interpreted the  
19 response in this exact manner. ¶75 (November 3, 2023 UBS research note stating  
20 “*SWKS remains a trusted supplier to AAPL and we think SWKS can sustain ~10%*  
21 *Y/Y dollar content growth in future smartphone launches*”); *id.* (Oppenheimer note  
22 stating that Skyworks’s iPhone position “*is secure gen/gen*, in our view”). It was  
23 not puffery because the exchange related to a specific and material metric—growing  
24 revenue by 10% for the next iPhone cycle. *Supra* at 13-14; *see also* *Warshaw v.*  
25 *Xoma Corp.*, 74 F.3d 955, 959 (9th Cir. 1996) (even “general statements of  
26 optimism, when taken in context, may form a basis for a securities fraud claim” when  
27 they address specific aspects of a company’s operation that the speaker knows to be  
28 performing poorly).

1        Likewise, the additional statement, “In the mobile business we absolutely  
2 know where the dollars are and where the opportunities are, and we have eyes on all  
3 that, and we’ll continue to drive that portfolio very strong,” was misleading. ¶131.  
4 While the initial question related to inventory adjustment and “shipping to actual  
5 real consumption,” (*id.*), Griffin’s unhedged response suggested that Skyworks  
6 would “sustain” “content growth in future smartphone launches” such as the iPhone  
7 16, (¶75). Because Skyworks’s content position was “capable of objective  
8 verification,” *cf. Farhar v Ontrak, Inc.*, 714 F. Supp. 3d 1198, 1209 (C.D. Cal. 2024)  
9 (DB 14), the statement is not immaterial puffery.

10        **3. January 30, 2024 Quarterly Earnings Call**

11        On a quarterly earnings call on January 30, 2024, Defendant Griffin made two  
12 misleading statements after Skyworks not only knew its reduced iPhone 16 content  
13 position, but also had begun manufacturing its assigned component parts. First, in  
14 answer to an analyst question about whether *Skyworks “may be losing content at*  
15 *your largest customer in the second half of the year”*—i.e., in connection with the  
16 iPhone 16—and “*how you’re feeling content-wise with that largest customer*,”  
17 Griffin stated that “we **have** a great position with our largest customer,” “[n]othing  
18 really **is** concerning on that point,” “we **know** exactly who we are and who they are,”  
19 “we **have** great partnerships,” and “**we’ll continue** to drive success.” ¶136.

20        This was not a forward-looking response, DB 14, but rather an answer using  
21 the present tense asserting present facts in response to a question about the present  
22 (i.e., whether Skyworks “may be losing content”). The safe harbor does not insulate  
23 misleading statements about current or past facts. *Glazer Capital Mgmt., L.P. v.*  
24 *Forescout Techs.*, 63 F.4th 747, 774 (9th Cir. 2023) (statement that company’s  
25 “pipeline was large, healthy, and continuing to grow” was not forward-looking since  
26 it “describe[d] . . . current conditions”); *Quality Sys.*, 865 F.3d at 1142-43  
27 (statements about sales pipeline, such as “[o]ur pipeline is deep[,]” are not forward  
28 looking); *Okla. Firefighters Pension & Ret. Sys. v. Six Flags Ent. Corp.*, 58 F.4th

1 195, 210-11 (5th Cir. 2023) (assertion that parks “were undergoing sufficient  
2 construction to meet the deadlines” misled investors about the Company’s present  
3 construction).

4 Further, Defendants identify no meaningful cautionary language that would  
5 allow them to qualify for the safe harbor. *Baker v. Twitter, Inc.*, 2023 WL 6932568,  
6 at \*7 (C.D. Cal. Aug. 25, 2023) (defendants “bear the burden of showing” the  
7 presence of “cautionary language [that] was not boilerplate”). The alleged  
8 cautionary language “must relate directly to that which plaintiffs claim to have been  
9 misled,” *In re Atossa Genetics Inc. Sec. Litig.*, 868 F.3d 784, 798 (9th Cir. 2017);  
10 and it also must not be “spread out among various documents.” *In re HI/FN, Inc.*  
11 *Sec. Litig.*, 2000 WL 33775286, at \*5 (N.D. Cal. Aug. 9, 2000). Here, Defendants  
12 fail to identify any specific cautionary language, let alone such language that directly  
13 accompanied the misstatements. Insofar as Defendants wish to rely on the risk  
14 disclosures in Skyworks’s 10-K filings, those disclosures are themselves deficient  
15 and misleading. *Infra* at 20-21. In addition, any cautionary effects of the risk  
16 disclosures in Defendants’ earlier SEC filings were negated when Griffin gave  
17 investors unqualified positive reassurances in the January 2024 earnings call.

18 Nor is the statement an actionable opinion. Whether Skyworks was “losing  
19 content” as of January 30, 2024, is a verifiable fact, not an opinion, and Griffin’s  
20 statements about Skyworks’s content position in the iPhone 16 “directly  
21 contradict[ed] what [he] knew at the time.” *E. Ohman J:Or Fonder AB v. NVIDIA*  
22 *Corp.*, 81 F.4th 918, 929 (9th Cir. 2023). Even if construed as an opinion, the  
23 Complaint plausibly alleges falsity under each prong of *Omnicare v. Laborers Dist.*  
24 *Council Const. Ind. Pens. Fund*, 575 U.S. 175 (2015): (1) Griffin did not subjectively  
25 believe that “nothing really is concerning” given the material content loss; (2) the  
26 answer includes the false embedded fact that “nothing” was concerning about the  
27 loss of content; and (3) Griffin omitted facts about Skyworks’s material loss of  
28 content position “whose omission makes the opinion statement at issue”—which

1 was specifically about whether Skyworks may be losing Apple content—misleading  
2 to a reasonable person. *See Atossa Genetics*, 868 F.3d at 801-802.

3 Griffin also misled investors by telling them that Skyworks “remain[s] bullish  
4 on the long-term RF content story in smartphones coupled with growing 5G  
5 penetration.” ¶135. Defendants’ claim that a statement about long-term RF content  
6 in “smartphones” does not relate to Apple or the iPhone is meritless. Apple was  
7 Skyworks’s largest customer, and sales to Apple represented the bulk of Skyworks’s  
8 revenues. ¶¶1, 4, 27, 35, 118, 120, 135-36, 140, 169-70, 179, 191. Indeed, the  
9 defense exhibit cited by Defendants notes that sales to Apple comprised 73% of total  
10 quarterly revenue. D.Ex.4 at 9. Nor was the statement immaterial puffery. Whether  
11 Skyworks could grow “long-term RF content” was a primary metric that analysts  
12 focused on in assessing the Company. ¶¶64, 66, 69, 72, 90, 98-100, 118-19, 145.  
13 When Skyworks finally reported that it had lost a material content position on the  
14 iPhone 16, the share price cratered, ¶¶76-80, further demonstrating materiality.

15 **4. March 5, 2024 Investor Conference**

16 On March 5, 2024, Defendant Griffin participated in the Morgan Stanley  
17 Technology, Media & Telecom Conference. ¶72. The host asked him a question that  
18 directly referenced the iPhone 16 and other models. In response, Griffin explained,  
19 ***“I don’t want to be too controversial about it, but the larger customer definitely  
20 prefers the kind of things that we do, honestly. No one really likes to deal with  
21 contracts and agreements and this and that.”*** ¶¶73, 138. Griffin stated further that  
22 there is ***“nothing that we really can’t handle.”*** *Id.*

23 This statement was misleading. Having decided to speak about Skyworks’s  
24 largest customer, Apple, Griffin was required to provide complete and accurate  
25 information so as not to materially mislead investors. *Khoja*, 899 F.3d at 1009.  
26 Claiming that the “larger customer definitely prefers the kinds of things that we do”  
27 and that there was “nothing” in the relationship “that we really can’t handle” was  
28 misleading because Griffin did not inform investors that Skyworks had lost a content

1 position on the iPhone 16. ¶¶138-39. Such an omission is actionable if viewed either  
2 as creating a misleading half-truth, or as an omission rendering an opinion about the  
3 Apple/Skyworks relationship materially incomplete. *Supra* at 17.

4 Nor was the statement immaterial puffery. The status of Skyworks's  
5 relationship with Apple was clearly important to the host, who asked about it at a  
6 public investor conference. Griffin's response was not a "feel good moniker," *cf. In*  
7 *re Fusion-io, Inc. Sec. Litig.*, 2015 WL 661869, at \*14 (N.D. Cal. Feb. 12, 2015),  
8 but a representation that Apple preferred Skyworks's product—made just prior to  
9 Skyworks's revelation that it suffered a material content loss that led to a severe drop  
10 in the stock price, shocking analysts. ¶¶76-85.

11 **B. Alleged Mistatements Regarding the iPhone 17**

12 **1. November 12, 2024 Earnings Call**

13 Defendants' assertion that Griffin's statement on November 12, 2024 was not  
14 specific to the iPhone 17 is belied by the earnings call transcript they attach as an  
15 exhibit to their brief. As that transcript reveals, an analyst asked "what's going on  
16 with your largest customers," referenced what "appears to be temporary upheaval,"  
17 and specifically asked, "What's your feeling in terms of 2025" as "there's some  
18 content changes in the last flagship phone" (i.e., the iPhone 16, which had just been  
19 released in September). D.Ex.6 at 5. He further asked Griffin about his view  
20 regarding Skyworks's "ability to gain back content when they"—i.e., Apple—"make  
21 a big shift and then perhaps grow from there." *Id.*

22 Griffin's answer—that "we have a very good partnership with our largest  
23 customers," that the "back and forth is always going our way," and that "we have  
24 the confidence of our most important customer"—reiterated Skyworks's narrative to  
25 investors that its iPhone 16 content loss was a "one year, one socket" event and that  
26 its relationship with Apple (Skyworks's "largest" and "most important" customer,  
27 ¶¶4, 7, 35, 169, 187) was secure. ¶¶86-87. This was misleading because Griffin knew  
28 that Skyworks had lost a material content position on the upcoming iPhone 17. ¶¶96-

1 97, 140. Indeed, analysts had already reported *five months earlier* that Broadcom  
2 won a new iPhone 17 content position, which supports an inference of falsity.

3 Defendants' only substantive challenge is that the statement was "forward-  
4 looking." Once again, Griffin discussed the present status of Skyworks's relationship  
5 with Apple and its present ability to gain back content—to which Griffin provided a  
6 present-tense response touting that relationship, without describing his awareness of  
7 iPhone 17 content losses. *Supra* at 16. Nor do Defendants provide any meaningful  
8 cautionary language accompanying Griffin's statement that is not "spread out among  
9 various documents." *HI/FN, Inc.*, 2000 WL 33775286, at \*5. The only document  
10 Defendants cite (DB 15) is the November 2023 10-K, which misleadingly described  
11 content losses as hypothetical. *Infra* at 20-21. And Griffin further swept away this  
12 risk by asserting that the "back and forth is always going our way." ¶87.

13 **2. January 8, 2025 Investor Meetings**

14 The Complaint alleges that three statements made to analysts during a "sit-  
15 down" at an investor conference, and reported by Oppenheimer and JP Morgan,  
16 respectively, are materially misleading. Defendants' principal argument is that  
17 statements recounting what a Defendant told analysts are inactionable as a matter of  
18 law. DB 16-17. That ignores that misstatements that "clearly originated from the  
19 defendants, and do not represent a third party's projection, interpretation, or  
20 impression" as reported in analysts' reports, can "be actionable even if they are not  
21 exact quotations." *Nursing Home Pension Fund, Loc. 144 v. Oracle Corp.*, 380 F.3d  
22 1226, 1234-35 (9th Cir. 2004) (finding actionable statement "Oracle sees robust  
23 demand for both its database and applications business," as reported by analyst).

24 Here, the Oppenheimer report describes a "sit down" with Sennesael, who  
25 was accompanied only by an investor relations executive. It then directly cites  
26 several statements about Skyworks's operations from Sennesael—identified as  
27 "mgmt.," e.g., "Mgmt sees iP 15/16 [iPhone 15 and iPhone 16] as aberration years,"  
28 management "highlighted positive tailwinds from Apple design process," and

1 “Mgmt sees content [Average Selling Price] back to historical average 10%/year  
2 growth.”<sup>4</sup> ¶¶98-99. When an analyst report specifically attributes statements to  
3 “Management,” “it is certainly plausible that the statements originated from” the  
4 sole company executive who met with the analysts. *OmniVision*, 937 F. Supp. 2d at  
5 1105-06; *Nursing Home*, 380 F.3d at 1234. Further, the JP Morgan analyst report  
6 dated January 8, 2025, which contains very similar summaries of company  
7 statements from a meeting with Sennesael the same day, also satisfies this standard.

8 Finally, Defendants’ reliance on cases involving an “imprimatur” theory of  
9 falsity (i.e., where plaintiffs seek to hold companies liable for adopting outside  
10 analysts’ forecasts), or where analysts repackage a statement in vague terms, DB 17,  
11 is misplaced. This case, by contrast, involves only statements about specific growth  
12 metrics that “clearly originated from the defendants,” i.e., “management,” and are  
13 actionable. *Nursing Home*, 380 F.3d at 1234-35 (distinguishing between  
14 misstatements attributed to company executives and of forecasts by third parties on  
15 which executives “put their imprimatur”).

16 **C. Alleged Misstatements Regarding Hypothetical Risks**

17 Skyworks filed its Form 10-K annual reports in November 2023 and 2024, at  
18 a time when Defendants knew of lost content positions in the iPhone 16 and iPhone  
19 17, respectively. ¶¶147-50. These risk statements were incorporated into subsequent  
20 quarterly disclosures during the Class Period. ¶151. The risk disclosures were  
21 misleading because they presented the risk of losing content with Apple as  
22 hypothetical when Defendants knew that Skyworks had already lost content  
23 positions in the upcoming iPhone 16 and 17 models. ¶¶147-52. Such “inadequate”  
24 risk statements are actionable because they misrepresent specific types of risks “as  
25 purely hypothetical when that exact risk had already transpired.” *In re Facebook*,

26  
27  
28 <sup>4</sup> Defendants are wrong that Plaintiff relies on “group pleading” or a presumption  
that the alleged misstatements “are the collective action of the Defendants.” Cf. *In*  
*re Hansen Nat'l Corp. Sec. Litig.*, 527 F. Supp. 2d 1142, 1153-54 (C.D. Cal. 2007).

1 *Inc. Sec. Litig.*, 87 F.4th 934, 949, 951 (9th Cir. 2023); *see also Siracusano v.*  
2 *Matrixx Initiatives, Inc.*, 585 F.3d 1167, 1181 (9th Cir. 2009) (risk disclosures  
3 actionable when the supposed possible risks had “come to fruition”).

4 Defendants’ reliance on *In re GlenFed, Inc. Securities Litigation* and *In re*  
5 *Cloudera, Inc.*, DB 17-18, is unavailing; neither decision analyzed the falsity of risk  
6 disclosures, unlike the controlling *Facebook* and *Matrixx* decisions. In *GlenFed*,  
7 moreover, the Ninth Circuit *rejected* the “fraud by hindsight” argument because, as  
8 here, the *GlenFed* plaintiff identified “contemporaneous . . . information” at odds  
9 with the alleged misstatements. 42 F.3d 1541, 1549 & n.8 (9th Cir. 1994). *Cloudera*  
10 also is distinguishable because, unlike here, the complaint failed to allege why the  
11 misstatements were false when made. 121 F.4th 1180, 1189-90 (9th Cir. 2024).

12 The Court also should reject Defendants’ argument that a separate risk  
13 disclosure in the November 2024 Form 10-K somehow revealed that Skyworks had  
14 lost a content position on the upcoming iPhone 17. DB 18. While the market knew  
15 by November 2024 of the content loss on the ***iPhone 16***, nothing in the “additional  
16 language” on page 18 of Defendants’ brief explains that Skyworks had, in fact, lost  
17 content on the ***iPhone 17***. A statement that Skyworks “could lose” market share in  
18 the future, when it already had lost market share on the upcoming model, is  
19 actionable. *In re Alphabet, Inc. Sec. Litig.*, 1 F.4th 687, 702-05 (9th Cir. 2021);  
20 *Facebook*, 87 F.4th at 949 (“This juxtaposition of a ‘could occur’ situation with the  
21 fact that the risk had materialized mirrors the allegations in the Facebook scenario.”).

22 Defendants do not identify a single analyst who interpreted this disclosure as  
23 indicating that Skyworks would lose Apple content in the iPhone 17. Rather, based  
24 on later statements made by Defendants after the risk disclosure, analysts concluded  
25 the opposite. *See, e.g.*, ¶100 (Jan. 8, 2025 J.P. Morgan stating “we believe the team  
26 is poised to return to its historical average content growth of 10% at Apple”).  
27 Defendants provide no basis to accept their construction of how a reasonable  
28 investor would interpret the disclosure at this stage of the litigation.

1 **III. THE COMPLAINT ALLEGES SCIENTER**

2 Scienter is pled if “all of the facts alleged, taken collectively, give rise to a  
3 strong inference of scienter, not whether any individual allegation, scrutinized in  
4 isolation, meets that standard.” *Tellabs, Inc. v. Makor Issues & Rights, Ltd.*, 551 U.S.  
5 308, 322-23 (2007). An inference is “strong” if a “reasonable person would deem  
6 the inference of scienter cogent and at least as compelling as any opposing inference  
7 one could draw from the facts alleged.” *Id.* at 324. At this stage, the court must  
8 “constantly assum[e] . . . plaintiff’s allegations to be true,” *id.* at 326-27, and draw  
9 all reasonable inferences in favor of the plaintiff. *Khoja*, 899 F.3d at 1008.

10 Defendants contend “there is not a single specific allegation in the CC that  
11 anyone at Skyworks, let alone Griffin or Sennesael, knew that the Company’s  
12 content position would be lower for the iPhone 16 or 17 when the Challenged  
13 Statements were made. . . .” DB 19. This “specific allegation” argument misstates  
14 the scienter pleading standard, which does not require allegations that are  
15 “irrefutable” or “of the ‘smoking gun’ genre.” *Tellabs*, 551 U.S. at 324.  
16 “Importantly, ‘[s]cienter can be established by direct or circumstantial evidence.’”  
17 *Davis v. Yelp, Inc.*, 2021 WL 4923359, at \*12 (N.D. Cal. Sept. 17, 2021). At this  
18 stage, Plaintiff need only allege particular facts giving rise to a strong inference of  
19 scienter, “not to produce admissible evidence.” *McKesson*, 126 F. Supp. 2d at 1272.

20 Here, the Complaint includes ample facts establishing that the most  
21 plausible—indeed, only plausible— inference was that Defendants knew that Apple  
22 informed Skyworks of its content decisions before they made the relevant false  
23 statements. These facts include information from former employees with personal  
24 knowledge of the iPhone manufacturing timeline and how Apple communicated  
25 content decisions to Defendants, disclosures from competitors of iPhone content  
26 wins, reports from industry insiders and analysts from leading financial institutions,  
27 and credible media sources. *Supra* at 8-12. Such allegations give rise to an inference  
28 that Defendants knew of Apple’s content decisions when they spoke about

1 Skyworks's content position, *Quality Sys.*, 865 F.3d at 1145-46, particularly since  
2 such information was critical to the Company. Further, even if Defendants somehow  
3 did not know this information, their disregard of such information before speaking  
4 about Skyworks's so-called positive execution, their lack of any concerns, and  
5 iPhone 17 content gains would be deliberately reckless. *Reese v. Malone*, 747 F.3d  
6 557, 569 (9th Cir. 2014) (deliberate recklessness exists when a defendant "had  
7 reasonable grounds to believe material facts existed that were misstated or omitted,  
8 but nonetheless failed to obtain and disclose such facts although he could have done  
9 so without extraordinary effort").

10 Defendants' argument of "pure speculation," DB 20, disregards the  
11 corroborative timeline allegations and ignores that courts must "consider the totality  
12 of circumstances" when evaluating scienter, including circumstantial evidence, and  
13 cannot "close their eyes to circumstances that are probative of scienter viewed with  
14 a practical and common-sense perspective." *S. Ferry LP, No. 2 v. Killinger*, 542 F.3d  
15 776, 784 (9th Cir. 2008). Likewise, Skyworks's new (and current) CEO's admission  
16 in March 2025 that, *over the last three years*, the Company had not "been growing  
17 our content," that "we haven't been performing that well," and that the Company  
18 had not delivered "the best product" and had become "too complacent," ¶¶124-26,  
19 furthers a scienter inference. So too does Griffin's abrupt resignation the same day  
20 as the February 2025 corrective disclosure, as well as Sennesael's the next quarter.  
21 *In re Fibrogen, Inc.*, 2022 WL 2793032, at \*25 (N.D. Cal. July 15, 2022) ("abrupt  
22 resignation tends to support scienter and may be considered together with other  
23 allegations . . . because scienter is reviewed holistically."); *In re Banc of California*  
24 *Sec. Litig.*, 2017 WL 3972456, at \*8 (C.D. Cal. Sept. 6, 2017) (finding that the  
25 defendant's resignation "'add[s] one more piece to the scienter puzzle.'").

26 Moreover, supplying content for the iPhone was "the critical core operation"  
27 at Skyworks. *Reese*, 747 F.3d at 569. The Complaint pleads in detail Defendants'  
28 understanding of Apple's outsized importance to Skyworks. Cf. DB 19-20. Apple

1 sales comprised well over 60% of Skyworks's annual revenue, and iPhone content  
2 comprised approximately 85% of those sales. Defendants also routinely referred to  
3 Apple as the Company's largest and most important customer, ¶¶4, 35, 191, and they  
4 recognized that the "core business" was to "always protect[] and defend[]" Apple.  
5 ¶168. These allegations, therefore, amply satisfy the "core operations" standard to  
6 infer scienter. *Berson*, 527 F.3d at 987-88; *No. 84 Emp.-Teamster Joint Council*  
7 *Pension Tr. Fund v. Am. W. Holding Corp.*, 320 F.3d 920, 943 n.21 (9th Cir. 2003).

8 Considered holistically, the Complaint thus alleges a strong inference that  
9 Defendants were aware of, but misled investors about, the true status of Skyworks's  
10 content in the iPhone 16 and iPhone 17. *Alphabet*, 1 F.4th at 706-07.

11 Defendants' "motive" argument, DB 19-20, is unavailing. Motive allegations  
12 are not required to allege scienter. *Id.* at 707; *see also Am. W. Holding Corp.*, 320  
13 F.3d at 944 ("the lack of stock sales by a defendant is not dispositive as to scienter.").  
14 Further, *Nguyen v. Endologix, Inc.*, 962 F.3d 405 (9th Cir. 2020), is inapposite. The  
15 false statements in *Nguyen* concerned the likelihood of FDA approval for a single-  
16 device medical startup, in which the plaintiff's scienter theory was that the  
17 defendants knew that there was "absolutely no hope" of FDA approval. The Court  
18 found that specific theory not as plausible as the opposing inference that the  
19 company would not have staked its existence on a trial that was "doomed to fail."  
20 962 F.3d at 415-16. Subsequent courts have limited *Nguyen* to its specific facts and  
21 found scienter adequately pleaded where, like here, it is as equally plausible that  
22 "defendants knew that they were withholding material information" than that their  
23 misstatements were the product of an innocent mistake. *In re BioMarin Pharm. Inc.*  
24 *Sec. Litig.*, 2022 WL 164299, at \*12-14 (N.D. Cal. Jan. 6, 2022) (rejecting *Nguyen*-  
25 based argument that "attacks a straw man" in a case where defendants told "the  
26 market things that were allegedly not true and that [they] must have known were not  
27 true by their nature"); *Skiadas v. Acer Therapeutics, Inc.*, 2020 WL 4208442, at \*8  
28 (S.D.N.Y. July 21, 2020) (rejecting *Nguyen* argument as "just old wine in a new

1 bottle” in case where plaintiff’s “theory is that Defendants knew that the FDA had  
2 not agreed to approve [the drug] but that they chose to say the opposite”); *Fibrogen*,  
3 2022 WL 2793032, at \*18 (*Nguyen* inapplicable to the misrepresentation of known  
4 issues).

5 Further, Defendants’ actions in concealing the content losses for as long as  
6 possible are not implausible or necessarily irrational. Skyworks was a multi-product  
7 company that repeatedly “told the market that it was focused on diversifying its  
8 product base to guard against its dependence on Apple,” *e.g.*, ¶3, and touted the  
9 strength of its supposedly broad portfolio just four weeks prior to the February 2025  
10 corrective disclosure, *e.g.*, ¶¶98-100. Defendants may have concealed the truth as  
11 long as possible in the hope that their product diversification strategy would mitigate  
12 the disclosure of iPhone losses, which is consistent with a cogent inference of  
13 scienter. *Makor Issues & Rights, Ltd. v. Tellabs Inc.*, 513 F.3d 702, 710 (7th Cir.  
14 2008); *Skiadas*, 2020 WL 4208442, at \*8 (crediting inference of a rational gamble  
15 that good news might overtake bad news).

16 **IV. PLAINTIFF ADEQUATELY ALLEGES A SECTION 20(A) CLAIM**

17 Finally, the Complaint alleges in detail that Defendants Griffin and Sennesael  
18 were the Company’s top executive leaders who shared responsibility for the  
19 Company’s important strategic decisions, for the accuracy of the Company’s SEC  
20 filings (which they signed), and for the Company’s communications with investors.  
21 ¶¶29-31, 128, 131-32, 135-36, 138, 140, 142-43, 145, 148-49, 151, 220-28. Such  
22 allegations are by no means “conclusory,” DB 22; rather, they readily satisfy §20(a)  
23 at the pleading stage. *See, e.g.*, *Ryvyl*, 2024 WL 4536471, at \*15.

24 **CONCLUSION**

25 For the foregoing reasons, the Court should deny the Motion.

1 Dated: November 18, 2025

Respectfully submitted,
